- React.js
- Redux
- npm
- Webpack
- Jest
- Enzyme
- Sass
- Axios
- Docker
- Netlify

## CERTIFICATIONS

- AWS Certified Developer

## WORK EXPERIENCE

### React Developer

Generac Power Systems

📅 2023 - current      📍 Waukesha, WI

- Developed a dynamic, user-friendly dashboard using React.js for monitoring backup power systems, helping 12 businesses visualize their solar generator's energy levels in real-time.
- Integrated Redux for managing the company's primary mobile application, shortening the average troubleshooting time by from 26 to 19 hours.
- Held detailed unit tests with Jest and Enzyme, **reducing post-deployment bugs by 58%**.
- Automated all build procedures for the company's latest home generators using npm scripts, lowering manual deployment tasks by 73%.

### Associate Web Developer

Kohl's

📅 2020 - 2023      📍 Menomonee Falls, WI

- Maintained 6 RESTful APIs on Axios for quick data retrieval, resulting in a 13% increase in Kohl's homepage responsiveness.
- Assisted in creating 6 landing page projects on Netlify, achieving 97.4% uptime and facilitating continuous deployment practices.
- Contributed to the development of the company's first e-commerce mobile application using Sass, growing customer churn rates by 29%.
- Handled the UX design process for Kohl's revamped website, refining user journey with simplistic layouts that **decreased the page's load speed by 1.7 seconds**.

### Junior Frontend Developer Intern

Zendesk

📅 2019 - 2020      📍 Madison, WI

- Worked under the UX team to implement 9 responsive design features, expanding the company's monthly active users (MAU) by 21%.
- Engaged in agile development processes, **meeting 84% of all sprint goals** and contributing to an overall improvement in team productivity.
- Helped senior developers ideate a new feature on Zendesk's main website that boosted user sign-ups by 32% within the first three months of launch.
- Oversaw documentation for the front-end build process, making all information easy to understand for new team hires.
